

FAUCETS SERIES
SHOWER SERIES

FAUCET TECHNOLOGY

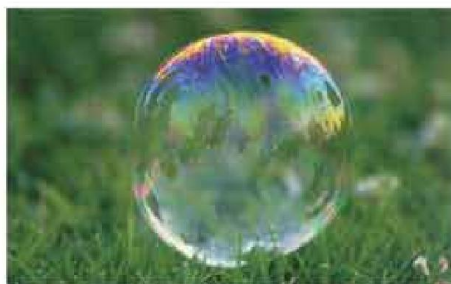

AESTHETIC DESIGN

Porta Faucet fuses the exquisite technology and the environmental friendly concept, and lead the innovation essence of the new trend, provide constantly surprise for you, create the noble, elegant bathing life for you.

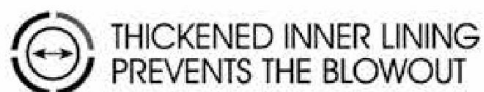

LEAD-REDUCTION TECHNOLOGY

Advanced lead-reduction technology, refined brass with lead content below 1.5%, effectively ensure the health.

SELECTED BRASS

Introducing German advanced frequency analyser analyses brass and ensure the raw material ingredients to meet the standard requirements.

THICKENED INNER LINING PREVENTS THE BLOWOUT

The wall thickness of the body are controlled between 2.6~3.0mm, can bear the heat-expansion and cold-contraction in the operating conditions.

IMPORTED CARTRIDGE

Porta faucet adopts the imported ceramic cartridge, is with anti-aging and anti-abrasion. The duration is more than 500,000 times, and it still switch smoothly.

HIGH-QUALITY AERATORS

Unique soft-water-flow design effectively reduce the fouling formation, with water-saving, environmental protection, no-splashing, more bubbles, and more effectively eliminate the noise.

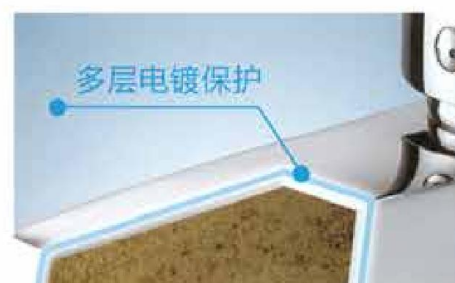

ENVIRONMENTAL FRIENDLY WASHER

Adopting the avirulent environmental friendly high-temperature resistant washer, it won't cause the water pollution, with more durable and super water-proof capability.

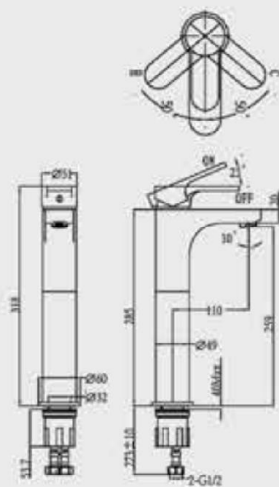

FLASHING PLATING

After the mirror polishing, the faucet appearance are processed by the chrome-plating and nickel-plating treatment. The thickness of the nickel-plating layer is 12~15um, and the one of the chrome plating layer is 0.25~0.50um. It is with super corrosion resistance, and still brightness after the long-time use.
